

Delta-1 Intercept of 1636 g/t Au over 1m

About Delta Resources Limited

Delta Resources Limited is a Canadian mineral exploration company focused on growing shareholder value through the exploration of two very high-potential gold and base-metal projects in Canada.

DELTA-1 is Delta's flagship project. The company is building a large gold inventory 50 km west of Thunder Bay, Ontario, at surface and adjacent to the Trans-Canada highway. To date, gold mineralization is defined over 2.5km from surface to a vertical depth of 300m. Highlights include drill intercepts such as **5.92 g/t Au over 31m** (incl. 14.8 g/t Au over 11.9m), **1.79 g/t Au over 128.5m** (incl. 2.16 g/t Au over 97.5 m), **0.97 g/t Au over 162.8m** (incl. 2.06 g/t Au over 65.8 m), **1.29 g/t Au over 97m**, **15.94 g/t Au over 10.0m**, **1636 g/t Au over 1m** and **697 g/t Au over 1m**. The property covers 306km².

DELTA-2 covers 205km² in the prolific Chibougamau District of Quebec. The property holds excellent potential for gold-rich polymetallic VMS deposits as well as hydrothermal-gold deposits. Delta targets VMS deposits such as the LeMoine past producer where 0.76 Mt were mined between 1975 and 1983, grading 9.6% Zn, 4.2% Cu, 4.5 g/t Au and 84 g/t Ag.

Delta's exploration program is fully funded for 2024.
